FDA and Food Contact Statement

Films supplied by Sigma Stretch Film are not intended nor approved for direct food contact. As a result, Sigma is not able to supply the following commonly requested documents:

1. Bioterrorism Act of 2002 policies and procedures
2. Third party audit results
3. GMP policies and procedures

Although our facilities are not inspected or approved to produce food grade films, it should be noted that the materials used to produce our clear and colorless films are approved under FDA 21 CFR177.1520 direct food contact regulations, and these films are considered safe for use as a secondary or tertiary packaging component.

A handwritten signature in black ink, appearing to read "Jeff Garcia", is positioned above the printed name.

Jeff Garcia
Technical Manager
Sigma Stretch Film
