Internal Audits

January 2018

As part of its commitment to providing the highest quality film in the stretch film industry, Sigma routinely conducts internal audits of process and quality control records at all 5 of its manufacturing facilities. These audits are informal and are performed by the Technical Manager on a bi-annual basis. The results of the audits are conveyed to Plant Management and Quality Technicians.

A handwritten signature in black ink, appearing to read "Jeff Garcia", is positioned above the printed name.
