Sigma Stretch Film is committed to continuously improve the quality of its products and services to better satisfy the needs and expectations of its customers; and to deliver to them, on time and every time, defect-free products and services.

Sigma Stretch Film manufactures and supplies stretch film to a broad range of customers for the packaging of their products. Sigma Stretch Film warrants its film free of any workmanship errors and stands behind its product completely. To accomplish this, Sigma Stretch Film follows an internally developed, comprehensive quality program that is custom designed to monitor manufacturing, quality, and logistical variables vital to our industry. Sigma Stretch Film is constantly developing new innovative procedures and processes to continually improve the quality, performance, and consistency of stretch film products. Sigma Stretch Film's quality system requirements and parameters are well defined and documented in extensive detail in the Plant Operations Manual and Quality Manual.

A comprehensive pre-process, process and post-process quality check system is in place. This ensures and warrants that all Sigma Stretch Films succeed in the correct application and will work as intended.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeff Garcia", is written over a light gray rectangular background.
