BHT/BHA Statement

This letter is to certify that Sigma Stretch Film produces no films with Butylated Hydroxytoluene (BHT) or Butylated Hydroxyanisole. BHT and BHA are common food preservatives that were used in plastic several years ago. As new antioxidants became available, these additives were eliminated from virtually all polyethylene resins.

A handwritten signature in black ink, appearing to read "Jeff Garcia", is positioned above the printed name.

Jeff Garcia
Technical Manager
Sigma Stretch Film
