Content and Recyclability of Stretch Film

Sigma Select Cast Machine Film is composed almost entirely of Virgin Linear Low Density Polyethylene (LLDPE) with small amounts of other Virgin Low Density Polyethylenes for property enhancement. All Stretch films manufactured by Sigma have a recycle code of #4 meaning they are readily recyclable. Sigma recommends checking with local recycling facilities for specific answers in regards to stretch film recycling.

A handwritten signature in black ink, appearing to read "Jeff Garcia", is positioned above the printed name.
