

Protect your silage with

SIGMA PERFORMANCE 5™

SIGMA PERFORMANCE 5™

Performance5 is a 5-layer blown silage stretch film expertly made to accomplish more baling with maximum efficiency. It is manufactured on state-of-the-art extrusion lines.

Performance5 uses proprietary resin blends to give you high UV protection with tremendous puncture resistance and more cling for outstanding performance.

Performance5 ensures each overlapping layer of film is sealed and remains intact during weather extremes. Developed for the world toughest climates, its reliability and consistency makes it the easy choice for your silage bale needs.

Sigma Stretch Film is the first and only one to produce a 5-layer silage stretch film in North America. Performance5 is available in 500mm and 750mm widths, and in white or light-green.

High quality silage products for every application...all available under one roof.
