

A little Steel, a little brick,  
a whole lot of containment.

**Sigma Steel**, our high performance thin cast film is designed to easily stretch more than similar products in this category, giving it an ease of use and lock-up feature that will contain your products like nobody's business. Most competitive films are very stiff and do not stretch but we got to thinking, isn't stretch one of the key functions of a stretch film? **Steel stretches and locks, keeping costs down and containment levels up.**
