Silage Content Statement	January 1 st , 2026– Dec 31 st , 2026
Dates Covered:	
Authorized Company Representative:	Brad Blankenship, Technical Manager, Sigma Stretch Film

Stretch film is made almost entirely of Linear Low Density Polyethylene (LLDPE) with small percentages of other types of polyethylene resins for property enhancement. There are also varying amounts of polyisobutylene (PIB) for cling in certain blends. These materials are all sourced domestically and no chemicals are sprayed on film during or after production.
