CFR 21.177.1520 Statement	January 1 st , 2026– Dec 31 st , 2026
Dates Covered:	
Authorized Company Representative:	Brad Blankenship, Technical Manager, Sigma Stretch Film

The legislation contained in CFR 21.177.1520 governs substances which are approved for use as basic components of single and repeated use food contact surfaces. While films produced by Sigma are not intended for direct food contact, the components of their structures are on the list of approved substances.

For clarification purposes, clear colorless films manufactured by Sigma are composed entirely of Linear Low-Density Polyethylene and depending on the SKU may contain polyisobutylene.

Brad Blankenship
Technical Manager
